THE RANSOM FUND.

Total of \$56,574 in Cash and \$7,000 in Unpaid Pledges.

BOSTON, Oct. 8 .- A statement of money received for the ransom fund for Miss Stone given out by Kidder, Peabody & Co. shows \$19,574.61 in cash and \$7,000 in unpaid pledges. GIVEN TOO MUCH FREEDOM.

Bulgarian Government Condemned for Tolerating Macedonian Outrages.

PHILIPPOPOLIS, Bulgaria, Oct. 8.-Public interest in the fate of Miss Ellen M. Stone, the kidnaped American missionary, intensifies here. There is widespread condemnation of the government for allowing such freedom to the Macedonian committee BRITISH STEAMER as to enable it to engineer the outrage Miss Stone resided here before she went to Salonica and she is well known throughout the country. The patriotic Bulgarians are incensed, as they recognize that Miss Stone and her colleagues of the American missions in Bulgaria and Macedonia have been their best friends throughout the troubles. There is no lack of indications that Prince Ferdinand is imperiling his own position by permitting such license to the committee as to enable it to blackmail prominent people in support of the Macedonian cause

NEW DRILLING APPARATUS.

Improvement Expected to Revolutionize Oil Field Operations.

Special to the Indianapolis Journal, ELWOOD, Ind., Oct. 8 .- A new apparatus for drilling gas wells, which promises to almost revolutionize that work, has just been given a successful test by Gilchrist Brothers, of this city, in the gas fields northwest of Elwood. The old derrick, always a necessary and picturesque part of the drilling appliance, is entirely done away with, and within the next year it is likely that the derricks, which have long been so familiar in the gas and oil districts, will be merely relics of olden days.

The new drilling appliance is all carried on a heavy truck, which may be moved from place to place quite as rapidly and conveniently as the ordinary wagon. Upon it are mounted the boiler and engine, together with all the tackle and pulleys necessary for drilling. At the rear is a tall "staff-pole," which when raised, answers all the purposes of a derrick. Instead of the usual weeks delay in erecting a new apparatus is in drilling order an hour after it reaches the spot where the well is to be sunk.
